DMN700E100

Larmknapp med inbyggt motstånd 100 Ohm för utomhusbruk utanpåliggande, röd med universalglas. Levereras med bakstycke. IP65

General

The DMN700E100 is a weather proof MCP, designed for outdoor application with an IP67 ingress protection rating. It comes with snap on connections, which ensure ease of installation and maintenance. Assembly of the unit is also made easy with a simple snap on fit, and 4 screws to secure the unit.

Installation

Installation time and ultimately cost, are of paramount importance. The MCP range directly reflects this need by providing a unique ‘plug and play’ concept designed specifically to reduce installation time. All new MCP products utilise a special terminal block, where all initial installation cabling is terminated. This terminal block is then simply connected to the back of the MCP. Simple,but effective, with no re-termination required and no time wasted.

Options and Approvals

Through new standards and legislation, both glass and re-settable operating elements may be used. To provide the greatest ‘flex-ability’, the new MCP range can be configured as either break glass or re-settable unit by simply changing from one element to another. No other additional parts or alternative products are required. Full compliance with the latest standards is essential and the new MCP outdoor call point range is approved to the latest EN54-11 standard

Detaljer

- Easy to install
- With break glass or resettable element
- Easy to replace glass
- High quality micro switch
- IP67 rated
- EN54-11 & CPD approved

Tekniska specifikationer

Detection

Monitoring	Activated, Off

Physical

Colour	Rot (RAL 3001)
Mounting type	Back box, Oberflächenmontage
Material (body)	PC / ABS

Environmental

Vandal proof	No
Environment	Draussen

Regulatory

Compliancy	CE, REACH, RoHS 2, WEEE
Certification	CPR, EN54-11

Kompatibla produkter

Kategori	Referens	Beskrivning
Detection device	DMN782	Skyddslock till larmknapp DMN700 och DM2010. Passar även till DMN900 och KAL455-serien.
Detection device	DMN787	Bakstycke för montering av larmknapp DMN700R, röd
Detection device	DMN800	Återställningsbart plastglas för DMN700- och DM2010-seriernas larmknappar. Ersätter standardglaset och tillåter aktivering och återställning utan behov för utbyte (1st/fp)
